ADITI GAVHANE

Aspiring Data Analyst and Software Developer

8850019669 gavhaneaditi5@gmail.com LinkedIn GitHub Mumbai , India

PROFESSIONAL SUMMARY

Final-year Electronics & Computer Science Engineering student and aspiring Data Analyst and Software Developer with hands-on experience in Python, SQL, web development, data analysis, and UI design. Strong foundation in programming, problem-solving, data structures and algorithms, data-driven decision-making, and software development concepts. Experienced in building practical web-based projects involving data collection, analysis, visualization, API integration, and user-focused interfaces. Analytical, adaptable, and quick to learn, seeking an entry-level Data Analyst or Software Developer opportunity to apply technical and problem-solving skills to real-world challenges.

EDUCATIONS

Pillai College of Engineering | Panvel 2023 - 2027

B.Tech. in Electronics & Computer Science Engineering

PROJECTS

CompareX

Developer

- Developing a web-based price comparison system that helps users compare product prices across multiple online marketplaces and identify better deals.
- Building the frontend using HTML, CSS, and JavaScript, with a Python-based backend and web-scraping workflow using Requests and BeautifulSoup.
- Designing functionality for product search, price comparison, price history, wishlist management, and Best Deal Score to support data-driven purchasing decisions.

Technologies / Tools Used : *HTML, CSS, JavaScript, Python, Requests, BeautifulSoup*

Vendor Performance Analysis

Data Analyst

- Analyzed vendor sales, purchasing, inventory, and pricing data using SQL, Python, Pandas, and Power BI to identify performance and profitability trends.
- Used SQL/SQLite for data transformation and aggregation, followed by EDA with Pandas, Matplotlib, and Seaborn to identify correlations, outliers, and underperforming products.
- Built an interactive Power BI dashboard with DAX and KPIs to evaluate vendor, brand, sales, and inventory performance.

Technologies / Tools Used : *SQL, Python, Pandas, Power BI, Matplotlib, Seaborn*

EchoAI — Personal AI Assistant

Developer

- Developed a web-based AI chatbot using Python, Flask, and the Google Gemini API to support conversational interactions.
- Implemented persistent conversation memory using JSON-based storage to maintain context across interactions.
- Integrated document upload and text extraction for PDF, DOCX, and TXT files to support document-based queries.
- Built a responsive user interface using HTML, CSS, and JavaScript, with error handling for API requests and document processing.

Technologies / Tools Used : *Python, Flask, Google Gemini API, HTML, CSS, JavaScript, JSON*

EmberWatch

Developer

- Developed a web-based wildfire tracking and visualization application for monitoring wildfire information through an interactive interface.
- Integrated APIs to retrieve wildfire-related data and display relevant information through an interactive, user-focused interface.
- Applied data visualization and API integration to present dynamic information in an accessible format.

Technologies / Tools Used : *HTML, CSS, Javascript*

SKILLS

Databases :	MySQL, SQLite
Frameworks & Libraries :	Flask, Pandas, BeautifulSoup
Languages :	English, Hindi, Marathi
Programming Languages :	Python, HTML, CSS, JavaScript
Soft Skills :	Analytical Thinking, Problem Solving, Data-Driven Decision Making, Adaptability, Teamwork, Communication
Tools & Platforms :	Git, GitHub, Power BI, Tableau (Basics), AWS (Basics)

CERTIFICATIONS

- **Deloitte Australia** — Data Analytics Job Simulation | Forage
- **Game Development Using Python** — Workshop | Alegria 2024, IEEE–PCE Student Branch
- **Introduction to Prompt Engineering with GitHub Copilot** — SimplyLearn, Microsoft
- **Power BI for Beginners** — SimplyLearn, Microsoft
